

**TO:** The Honorable Mayor and City Council Members

**FROM:** Michael C. Van Milligen, City Manager

**SUBJECT:** Bee Branch Creek Restoration Project, Bench and Trash Receptacle Design

**DATE:** October 27, 2015

City Engineer Gus Psihoyos recommends City Council approval to proceed with the fabrication of benches for the Bee Branch Creek Restoration Project using the Great Blue Heron design and the Biking Along the Bee Branch design, the two designs receiving the most votes from citizens from the six design proposals. It is further recommended that the trash receptacle designs are such that they complement the bench designs.

I concur with the recommendation and respectfully request Mayor and City Council approval.

  
Michael C. Van Milligen
