Introduction

The control of accumulations of snow and ice on the public ways of the City of Dubuque is the responsibility of the Public Works Department.

Snow and ice control operations are classified as emergency work and is accomplished as efficiently and expeditiously as possible with the resources available to City government. A combination of many factors overlay to make each snowfall and the effects of each such snowfall unique. Consequently, the snow and ice control plan for the City must be flexible enough to cope with and respond to varying conditions during and after each winter storm.

The snow and ice control program as set forth on the following pages reflects constant changes in methods of operations, plow and deicer routes, streets, equipment, and other facets of the program. Equipment and personnel noted by this program may be supplemented with equipment and personnel from other departments or hired from the private sector.

The snow and ice control program specifies that all improved streets within Dubuque's city limits will be plowed and receive applications of salt, salt brine, blended liquid deicer, crushed limestone, sand, and/or non-corrosive deicer when necessary before, during and after a winter snow or ice storm. Improved streets mean all publicly owned streets with a hard surface, regardless of type. Alleys are not included in the program, with the exception of those in the downtown business district and those few hard-surfaced alleys that serve as sole access to a residence (as authorized prior to 1990 or by City Council action).

Because of the high cost associated with removal operations, large snow accumulations will be removed only when necessary from improved streets, alleys and municipal parking lots in the downtown district and the Port of Dubuque.

Snow accumulations may also be removed from heavily traveled arterial streets as time and budget constraints permit. Any removal operations performed on arterial streets are for the purpose of facilitating the safe and proper flow of vehicular traffic only.

Every April, the Public Works Department will evaluate its remnant salt supply. If additional salt is determined to be needed, the Public Works Department will solicit bid proposals for snow and ice control road deicer salt in May or June for the following winter season. Salt will

be purchased by the barge load, unloaded at the City of Dubuque's Purina Drive barge terminal by November 15th, and placed in the salt storage fabric building on site until removed by the City of Dubuque. Off season direct purchases from a company already storing salt in Dubuque is sometimes an option. In that case, the salt is then purchased and moved to the City's storage facility in April of each year.

General Operation Overview

During a winter storm, fifteen (15) City plow/spreader trucks will be dispatched when necessary to plow and treat Dubuque's streets. Each truck is assigned to one of fifteen (15) zones or routes into which the City is partitioned. * If snowfall accumulations are in excess of six (6) inches, motor graders and plow-equipped wheel loaders may be dispatched to assist with plowing operations. Contingent upon pavement conditions at the time of deployment, these plows will be assigned to one of the heavy plow routes. The current budget provides that all improved streets are to be cleared for vehicular travel within forty-eight (48) hours of the cessation of a winter storm

* Each zone has three subcategories:

1. Primary streets
2. Secondary streets
3. Residential streets

During operations, primary streets are plowed and treated continuously until they are cleared for safe vehicular traffic. Once the primary streets are open, secondary streets are plowed and treated until open. Finally, Residential streets within each zone are plowed and treated.

Officials in Charge

Name	Title	Email
John Klostermann	Public Works Director	jkloster@cityofdubuque.org
Arielle Swift	Assistant Public Works Director	aswift@cityofdubuque.org
Paul Davis	Public Works Field Supervisor	pdavis@cityofdubuque.org

As Designated by Director:		
Anderson Sainci	Resource Management Coordinator and Supervisor	asainci@cityofdubuque.org
Tom Kuhle	Fleet Maintenance Supervisor	tkuhle@cityofdubuque.org
Doug Hughes	Landfill Supervisor	dhughes@cityofdubuque.org
Ken Miller	Landfill Administrator	kmiller@cityofdubuque.org

Preparedness

Winter operations' internal call list shall be completed and distributed no later than November 1st each year. The list will specify:

1. Names of snow and ice control personnel
2. Contact Information for personnel
3. Routes/Zones personnel are assigned
4. 12-HR shift personnel are assigned
5. Salt operation Handling Contact Information

Winter operations' external call list will be completed and distributed no later than November 20th each year. The list will specify:

1. Names of heavy-equipment private sector contractors

2. Contact information for private contractors
3. Available equipment
4. Equipment prices per hour
5. Any additional items the director will need to make as an informed decision as possible, during heavy snow and ice control operations.

All city snow and ice personnel will undergo annual orientation and training during the month of November each year. Prior to the first anticipated snow fall, or no later than November 12th each year, all appropriate trucks, heavy equipment, and machinery will be ready for snow and ice operations.

Weather Warnings and Alerts

Due to the need for twenty-four (24) hour monitoring, A private meteorological firm shall be retained annually to supplement the forecasts received from the National Weather Service Office in Davenport, Iowa. At present, DTN is the contracted private firm for the City of Dubuque. Providing forecasts each day, seven (7) days a week, with additional updates when warranted, these forecasts are received through Weather Sentry Online Pavement Forecast Transportation Edition. The Weather Sentry Online Pavement Forecast Transportation Edition is a web site hosted and maintained by the contracted vendor. The forecasting service provides alerts to desktop or mobile devices, online weather briefing, pavement temperature and treatment recommendations. This web-based service is made available to all Public Works personnel with an available internet connection.

Designated officials in charge currently receive alerts. Then, reviews updated forecasts prior to determining needs to call in the snow and ice control response team.

Truck Plow & Salt Spreader Operations

From approximately November 15th through April 1st, thirty (30) Public Works Department personnel are assigned as plow/spreader truck operators. Shift start and end dates are subject to change each year. The Public Works Director will authorize the start and end of each shift each season. These operators are assigned to either the 4:00 AM to 12:00 noon or 12:00 PM to 8:00 PM work shifts. The 4:00 AM to 12:00 PM operators are responsible for operating the trucks during the AM hours between midnight and noon during the winter months. The 12:00 PM to 8:00 PM operators are responsible for the PM hours between noon and midnight.

At the inception of a winter storm, the fifteen (15) plow/spreader truck operators are dispatched onto their zones/routes. During normal work hours, this decision is made by the Public Works Director, Assistant Director, or authorized supervisors. During the night and on holidays and weekends, the Public Works Director, Assistant Director, or authorized supervisors receive input from the Police Department to aid in determining when operators are dispatched.

The Public Works Director, Assistant Director, or supervisors determine what types of materials will be spread on Dubuque's streets. Their decision is based on variables such as air temperature, pavement temperature, type of precipitation, wind, and forecasted post-storm air temperatures. Due to extremely cold pavement temperatures or other uncontrollable weather conditions, ice or snow may remain on driving surfaces after all operations have ended. Also, any new concrete streets judged as susceptible to damage from deicers may receive limited deicer treatments or be treated with a liquid low-corrosive deicer or abrasive materials. These streets will be noted on their respective routes. Usage of limited deicers or abrasives may result in snow- and ice-covered driving surfaces on the new concrete streets, even after normal operations have ended.

Normal Winter Pavement Conditions - Examples of pavement conditions drivers may encounter during and after a winter storm events

Pavements 100% snow covered:

Pavement driving lanes plowed with limited open lanes:

Pavement fully plowed with driving lanes treated:

Residential street plowed and treated with areas of snowpack remaining.

Additional Plow Operations

In the event of a severe winter storm, Public Works Department plows and personnel will be supplemented with equipment and operators from other City departments. If budget constraints allow, plows and operators may also be hired from the private sector.

If snowfall accumulations are more than six (6) inches on street surfaces, motor graders and plow equipped wheel loaders are usually dispatched to assist with plowing operations. If needed, these plows will first help clear the primary and secondary streets. After those streets are open for vehicular traffic, the plows will then be dispatched to clear the streets listed on the fifteen (15) general plow routes.

Additional Public Works Equipment Available:

Equipment Number	Type	Peripherals
3226	Motor Grader	12' blade
3209	Wheel Loader	12' plow blade with gate
3235	Wheel Loader	12' plow blade with gate
3244	Wheel Loader	12' plow blade with gate

Equipment Number	Type	Peripherals
3250	Wheel Loader	12' plow blade
3255	Wheel Loader	12' plow blade with wing
3201	31,000 GVW Dump Truck	Front Mount Plow, Flat Box Conveyor/Spreader, slide in liquid anti-icing unit
3203	31,000 GVW Dump Truck	Front Mount Plow, Flat Box Conveyor/Spreader, Underbody Mount Plow, and Liquid anti-icing unit
3205	31,000 GVW Dump Truck	Combination spreader box & front snowplow
3231	15,000 GVW Dump Truck	Combination spreader box & front snowplow
3101	¾ Ton 4WD Pickup Truck	8' Snowplow

i See APPENDIX for Routes associated with additional Public Works Plow Operations

Vehicle Parking and Towing

To facilitate snow plowing and removal operations in the downtown area, Section 9-14-321.627 of the Code of Ordinances provides for alternate-side street parking on most downtown streets. This section also authorizes ticketing and/or towing and impoundment of vehicles parked in violation of this restriction. Section 9-14-321.682 provides for odd/even parking on the following streets and posted snow routes during designated times:

E 22 nd from Windsor to Central	Kaufmann Avenue
E 32 nd from Jackson to Central	Kelly Lane
W 32 nd from Central to Wildwood	Loras Blvd
Alta Vista from University to Kirkwood	N Grandview
Asbury Road	Old Mill Road
Bryant Street	Pennsylvania Avenue
Cedar Cross Road	Clarke Dr from W Locust to Asbury
S Grandview	Delhi Street
University Avenue	Fremont Avenue
W Locust from W 17 th to Clarke Drive	Rhomberg Avenue
Central Avenue from 22 nd to 32 nd	Rockdale Road
Hill Street	Windsor Avenue
Kane Street	Wooden Street
E 24 th Street	

Section 9-14-321-681 of the Code of Ordinances prohibits the parking of vehicles on any designated streets in the City if such parking interferes with the plowing or removal of snow or ice when a snow emergency has been declared. Section 9-14-321.685 of the Code of Ordinances authorizes the towing and impoundment of vehicles parked in violation of any proclaimed snow emergency.

Sections 9-15-321.770, 9-15-321.771, and 9-15-321-772 of the Code of Ordinances set forth the towing and storage procedures for impounded vehicles. Section 9-14-321-621 of the Code of Ordinances provides a schedule of fines for the parking of vehicles that interfere with snow or ice removal activities.

Snow and Ice Removal Operations

Due to the high costs associated with removal operations, snow accumulations will be removed only when necessary from streets, alleys and municipal parking lots in the downtown district and the Port of Dubuque. Snow accumulations may also be removed from high traffic arterial streets, as time and budget constraints permit. Any removal operations performed on arterial streets are for the sole purpose of facilitating the safe and proper flow of vehicular traffic.

Snow removal operations in the downtown district shall generally be performed at night in order to avoid heavy traffic and congested parking. Snow removal operations on arterial streets shall generally be performed during the day in order to accommodate the residents on those streets. Rotary snow blowers, wheel loaders, motor graders, backhoe-loaders, and dump trucks shall be used for such operations. Private equipment and operators may be hired to assist in such operations, but only when deemed necessary.

When necessary, snow will be removed from cul-de-sacs and ice accumulations from streets to facilitate future snow plowing operations. Snow may also be removed from any residential street, with the City Manager's approval, for the sole purpose of facilitating the safe and proper flow of emergency and other vehicular traffic.

See APPENDIX for Routes associated with Snow and Ice Removal Operations

Median Crossovers

After all streets have been cleared for vehicular travel, median crossovers between the traffic islands on Grandview Avenue and Kerper Boulevard will then be plowed and treated.

Major accumulations of ice and snow may be removed to provide adequate visibility for vehicular traffic when deemed necessary.

Pedestrian and Parking Assignments

The Public Works Department is also responsible for the control and removal of ice and snow accumulations from most City-owned walks, steps, traffic islands, pedestrian overpasses, and municipal parking lots. The current budget provides that identified pedestrian and parking facilities, including accessible parking stalls, will be cleared within seventy-two (72) hours of the cessation of a winter storm.

Parking Lots

Lot Number	Location	Description
02	9 th & Bluff	North side of West 9 th & West of Bluff
03	5 th & Bluff	North of West 5 th & West of Bluff
04	12 th & Bluff	South of 12 th & West of Bluff
05	12 th & Central	West 12 th , West 13 th , Central & Iowa bound lot
06	11 th & Bluff	South of West 11 th & West of Bluff
07	3 rd & Main	3 rd , Main, & alley East of Locust bound lot
08	Historic Federal Building	South Side of building
09	3 rd & Locust	South of 3 rd & East of Locust
10	West 5 th & Main	West side of Main & South of West 5 th
12	4 th & Central	Central, 4 th , & West of White – under HWY 151/61
13	18 th & Elm	Community Health Center Lot – East side
21	Elm	11 th & 12 th bound lot

At present, a private contractor is hired to complete snow and ice control for all listed parking lots. The private contractor provides plowing services and is required to deice each lot after snow plowing is complete.

Port of Dubuque

Paved parking lots included under the umbrella of Port of Dubuque are Lot 01, 02A, 02B, 03, and 06.

Accessible Parking Stalls at Public Facilities

Facility Name	Description
City Hall	1 – located in metered area of parking lot 2 – located in the alley near Iowa Street
City Hall Annex	1 – located mid-block on the north side of 13 th between Main & Iowa
Carnegie-Stout Library	1 – located SE corner of 11 th between Bluff & Locust 2 – located NW corner of Locust between 10 th & 11 th
Five Flags Center	1 – located mid-block on west side of Main between 4 th & 5 th 2 – located SE corner of Locust between 4 th & 5 th
Historic Federal Building	1 & 2 – two parking spots SE corner of W 6 th & Bluff 3 & 4 – two parking spots NW corner of W 6 th & Bluff

Mystique Ice Center

The Public Works Department will remove snow from the parking lot located at the Mystique Ice Arena, as needed, after snow removal is completed in the downtown, Historic Mill Work District and Port of Dubuque areas. On game days, plowing and deicing operations will be completed by 5:00 PM on the three other parking lots located in various areas along Admiral Sheehy Drive by Park Department.

Downtown Alleys

After all streets have been cleared for vehicular travel, alleys in the downtown district shall be plowed and treated. Major accumulations of ice and snow may be removed if budget and time constraints permit.

1 st Priority	2 nd Priority
Main – Locust – 5 th – 10 th	Central – White – 4 th – 18 th
Iowa – Main – 6 th – 11 th	Central – Iowa – 14 th – 17 th
Central – Iowa – 8 th – 14 th	Main – Iowa – 4 th – 3 rd
	Main – Iowa – 11 th – 15 th
	Main – Locust – 4 th – Jones
	Main Locust – 10 th – 17 th
	Bluff – Locust – 8 th - Dodge
	Bluff – Locust – 10 th – 11 th

Catch Basins

Stormwater catch basins located along arterial streets and/or in key drainage areas will be opened within a reasonable time following snowfall if temperatures over 32 degrees Fahrenheit are expected soon thereafter. Timing will depend to a great extent upon short-range weather forecasts. Critical catch basins are located along:

- | | |
|--------------------|---------------------|
| Bryant Street | Pennsylvania Avenue |
| Eighth Street | Hillcrest Road |
| University Avenue | Asbury Road |
| Loras Boulevard | Central Avenue |
| West Locust Street | Jackson Street |
| Kaufmann Avenue | Washington Street |
| Elm Street | JFK Road |
| Windsor Avenue | White Street |
| Rhomberg Avenue | 17th Street |
| Broadway Avenue | Grandview Avenue |
| East 22nd Street | Locust Street |
| Iowa Street | Main Street |
| Kerper Boulevard | 9th Street |
| E 11th Street | |

Snow and Ice Control Records

Storm data can be accessed when needed from the National Weather Service:

- 1) Storm Data:
 - a) Date
 - b) Inception Time
 - c) Precipitation Type
 - d) Temperature
 - e) Wind
 - f) Cessation Time
 - g) Total Accumulation of Precipitation

A winter storm log is kept on the City of Dubuque network: F>users>Public Works>Municipal Center>Snow>Annual Winter Storm Reports

- 2) Public Works Department Records:
 - a) Date
 - b) Time Crews Dispatched
 - c) Personnel and Hours Works
 - d) Equipment Used
 - e) Materials Used
 - f) Time Crews Finish

Training Program

In November of each year, all employees of the Public Works Department shall be briefed on the operations of the Snow and Ice Control Program. Discussions shall concern the operations as designed, assignments of operators for all equipment, and revisions made to the previous year's program. Training of new employees will be done at this time. All employees will be trained in the operation of any new equipment. Dry practice runs will be done by all employees on their assigned routes.

Zone and Route Maps

Electronic maps, using geographic information systems, display the following information:

- 1) Plow/Spreader Truck Zones
- 2) Primary Plow/Spreader Truck Routes
- 3) Plow/Spreader Pickup Truck Routes

These maps shall be revised each year to reflect new streets, special assignments and/or general restructuring of zones or routes.

Winter Storm Emergency

The Public Works Director shall advise the City Manager whenever non-emergency travel is to be discouraged. The City Manager is authorized to publicly announce such road conditions (Section 9-14-321-683)

Agreements/Addendum

A 28E agreement exists between Dubuque County, Iowa and the City of Dubuque, Iowa in accordance with the provisions of Iowa Code Section 28E (1998). The purpose of this agreement is to define the duties and responsibilities of Dubuque County and the City of Dubuque for snow and ice control on roads within the jurisdiction of both public agencies.

A 28E agreement also exists between the City of Asbury, Iowa and the City of Dubuque, Iowa in accordance with the provisions of Iowa Code Section 28E (1998). The purpose of this agreement is to define the duties and responsibilities of the City of Asbury and the City of Dubuque for snow and ice control on roads within the jurisdiction of both public agencies.

A separate agreement exists between Dubuque County, Iowa and the City of Dubuque, Iowa. The purpose of this agreement is to define the duties and responsibilities of Dubuque County and the City of Dubuque for snow and ice control on specific county road identified between the hours of 7:00 PM and 4:00 AM Sunday through Saturday.

Anti-Icing

Anti-icing is the snow and ice control practice of preventing the bonding of the initial snow and ice precipitation to street pavement through the timely, pre-storm application of a chemical freezing-point depressant.

When the Public Works Field Supervisor determines that conditions are favorable for the use of this anti-icing technology, a liquid deicer will be sprayed on the streets to prevent the bond of snow on the pavement. The snow manual lists streets that may be treating prior to the storm if conditions are favorable. In the event when conditions are not favorable for the use of this technology, conventional deicing techniques will be used.

Departure from Policy

The City of Dubuque, Iowa recognizes that winter conditions vary from year to year and from storm to storm. Consequently, when conditions warrant, the Public Works Director may order a departure from the snow and ice control and removal policies as stated in this manual to adjust to existing conditions. Such a departure shall be done only, except in the case of an emergency, after authorization by the City Manager. Any such deviation from the general policy will be appropriately recorded.

Auxiliary Plow Fleet (Internal)

When a snow accumulation is forecasted to exceed eight (8) inches, or when other conditions warrant, the City Manager may order that all City-owned vehicles equipped with snowplows report to the Public Works Department for plow route assignments.

This auxiliary plow fleet will be assigned to residential street plowing with the sole purpose of providing access to residential areas during major winter storms. Each department providing a supplemental snowplow vehicle will also provide an operator for an initial twelve (12) hour shift and have a second operator available if a second shift is necessary. By November 15th of each year, departments equipped with snowplow units are required to provide the Public Works Department with a description of each unit and its two operators. The Snow and Ice Control Manual will be updated annually to reflect any changes. Auxiliary plow operators will attend an annual snowplow training event conducted by the Public Works Department.

Private Contractor Fleets

When a snow accumulation is forecasted to exceed eight (8) inches, or when other conditions warrant, the Public Works Director consults with the City Manager to decide whether to hire private contractor fleets, for plowing or removal.

Snow Storage Areas

Snow hauled from municipal parking lots, parking ramps, downtown alleys, and streets by City and contractor crews will first use the following areas for snow storage first:

- a. Terminal Street City owned property – Snow removal principally from the City's
- b. Port of Dubuque areas, downtown streets, alleys, and parking ramp removal.
- c. Miller Riverview Park – downtown streets, alleys, and parking ramp removal
- d. Former Bowling and Beyond Parking Lots

Once the above areas are filled, snow will be hauled to the following locations:

- e. Dodge and Locust – IDOT property (permission is necessary from IDOT)

Once the above areas are full, it would be necessary to negotiate with private property owners for snow storage space.

Bus Stop Snow Removal

The Public Works Department will remove snow from the 34 most used stops bus stops, as identified by the transit department, when requested by the Transit Department. In addition, snow will be removed with-in 48 hours from any bus stop when a request is received from the Public.
